TARIFF SURCHARGE

Following the U.S. government's April 2, 2026 proclamation, the method used to calculate import duties on steel derivative products has changed. Effective April 6, 2026, tariffs are no longer assessed on the steel content value alone. They now apply to the full customs value of any product where steel weight exceeds 15% of the total finished product weight.

This change has increased the tariff burden on Stûv products imported into the United States. As we have done since the beginning of this trade disruption, we have chosen to absorb a portion of this impact rather than passing it on entirely to our customers.

We've maintained our responsive approach, applying a tariff surcharge calculated on the Manufacturer's Suggested Retail Price (MSRP). This allows us to adjust the surcharge in line with the duty enforced at the time the product crosses the border.

No additional profit margin has been added. The adjustment strictly covers the increased costs associated with the tariff change, ensuring a clear and transparent pricing structure.

Tariffs apply on	Tariffs %
All products and accessories	10%

As it is impossible for us to predict the direction of future government announcements, it is important to verify the applicable tariff policy at the time you place your order.

Unfortunately, we cannot guarantee the stability of the tariff surcharge, which means it may change without prior notice.

This update reflects the current situation, which continues to be closely monitored.

Stûv paint

Liquid paint and powder coat paint

Find these icons to know what type of paint is used.

Liquid Paint

Powder Coat Paint

We use two types of paint : a liquid-type paint and a powder coat-type paint.

The **liquid paint** applied on the units is a type of paint that is cured during the first burn.

Because it is factory-baked, **powder coat paint** is much more resistant, we use it on finishing accessories and front panels.

These two types of paints are not compatible.

It is therefore important to make sure that before making any touch-ups, the paint you are using is compatible with the item you are about to paint.

Rust process

Find this icon to determine if the rust finish is available.

Rust finish

A unique process obtained by natural oxidation of the metal in a controlled environment.

The process is stopped once a nice rusted look has been obtained. This means every piece is unique.

s[16]

[In brief]

for a perfect s16-Z quote

Mandatory

- ☐ Choose a finishing frame with a thin edge frame or a picture type frame

Recommended

- ☐ Adjustable stand to ease the installation
- ☐ Outside air intake connector, if an outside air connection is required

As needed

- ☐ Air damper Ø4"
- ☐ Outside air kit
- ☐ Complete and return the Order form : custom frame s16in-Z

⚠ Warning - To anticipate

- ☐ One Ø6" or Ø7" anchor plate for your chimney, via your supplier

Notes

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There is no handwriting or other markings on the paper.

[In brief]

for a perfect s21CLAD-sf2 quote

Mandatory

- ☐ Complete and return the Order form : s21CLAD

Recommended

- ☐ Powder coat paint in StuvGrey - We recommend that you paint the exposed portion of the insulated chimney
- ☐ Airtight box – The adjustable stand included with the s21CLAD will ease the installation of the airtight box
- ☐ Guillotine fire screen

As needed

- ☐ Air damper Ø4"
- ☐ Outside air kit

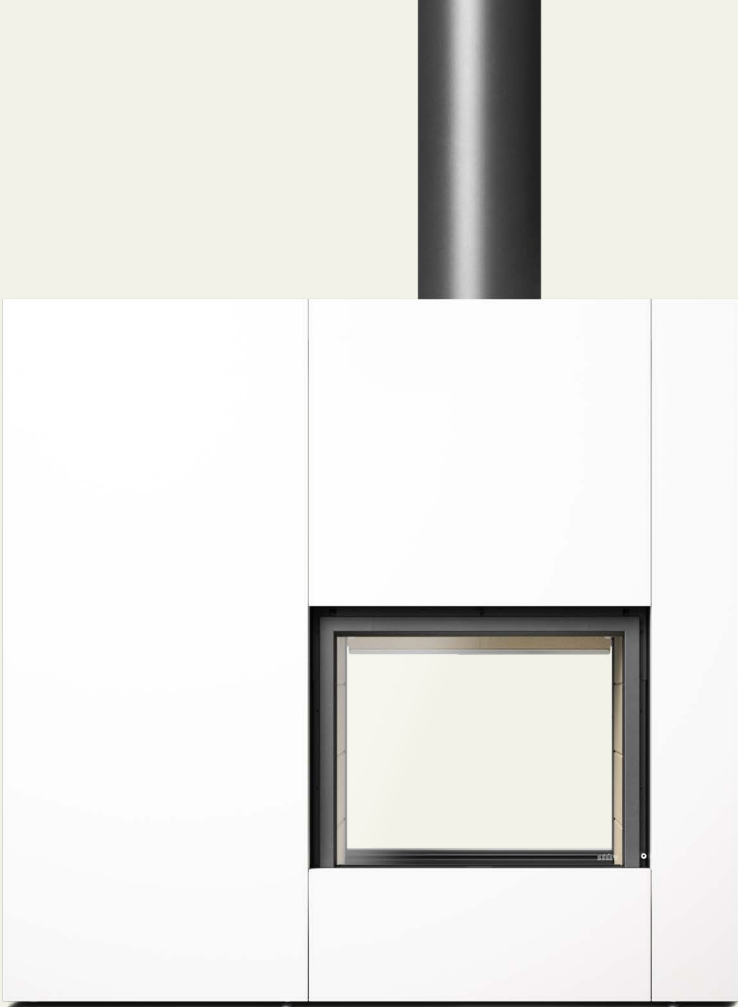

Warning - To anticipate

- ☐ 1 anchor plate for your chimney, via your supplier
- ☐ The floor must be protected under the unit with a non-combustible material without the need for an R factor (insulator)

Notes

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins or other markings on the paper.

s[30C]

[In brief]

for a perfect s30C quote

Recommended

- ☐ 2 spray paint cans in StûvGrey to paint the exposed stove pipe, if s30C or s30C-H models
- ☐ Floor plate – The floor plate must be chosen according to where the device is installed, and its ability to rotate within that space. Validate the clearances according to the desired configuration. Required if the floor is made of combustible material
- ☐ Fire screen
- ☐ Mass option - Heat accumulator, if s30C-H model

As needed

- ☐ Air damper Ø 4"
- ☐ Outside air kit
- ☐ Rear connector outside air intake, if the outside air cannot be connected underneath the unit
This accessory is not recommended if installed directly on an exterior wall

* A full box contains 17 CTBs. For optimal shipping and handling, we recommend ordering in multiples of 17 (e.g., 17, 34, 51), though you can order any custom amount.

2025 freight program

1. Under this program orders will be shipped via LTL and/or Monsma truck based on location.
2. Freight terms are:
 - \$190 per stove/insert
 - \$240 per fireplace
 - Clad please call for freight quote
3. Unloading is the responsibility of the customer. If any special needs (eg: liftgate trailer, phone ahead notice, etc.) are required, it must be noted on the purchase order. Additional charges for these and other carrier services are the customer's responsibility and will be invoiced as charged.

Expert handling, from our warehouse to you

We take several precautions to help prevent freight damage on common carrier shipments. Units are strapped with an extra pallet, wrapped in a blue shrink wrap that common carriers do not have, so it's apparent if repackaging occurs. Tip-n-Tells are placed on each pallet to indicate if packages may have been damaged during transit.
